## The next generation of computer storage solutions.

UCCSS20H (Shown with optional 2U drawer.)

UCCDS40H

The benefits of using electronic devices in schools are many. They can improve standardized test scores, hold hundreds of digital textbooks, increase student interaction and creativity, and, in the long run, even save money.

But in order to realize these benefits, the devices must be kept safe, secure, and ready to go at a moment's notice. Black Box's line of computer storage carts are the solution.

Black Box Universal Computing Carts come in many configurations to fill a school's needs and can safely store and transport many different kinds of devices, with cases and without, in a small footprint that is the perfect size for classrooms and administrative areas. Plus, the cart's top gives you the extra working space that's so often missing in today's crowded classrooms.

Black Box offers other options for schools as well, including iPad® Syncing Carts (page 6); and Laptop, Netbook, and Tablet Depots (page 7).

### Universal Computing Carts are different.

- **Future-Proof**—Black Box's unique solution enables you to store a wide range of equipment, from e-readers to multimedia laptops in the same cart. As your needs change in the future, the carts can be reconfigured by swapping out the shelving for laptops, notebooks, tablets, and e-readers, or a combination of equipment and storage options.
- **A Small Footprint**—Single Carts hold more in a smaller footprint while still offering a useable working surface that can serve as a podium.
- **Flexibility**—Secure, transport, and charge many devices including tablets, notebooks, and laptops.

- **Quality and Appearance**—Rugged, heavy-duty carts offer a high level of quality, durability, and usability.
- **Mobility**—Locking/swiveling casters provide the perfect blend of unrestricted and easy movement with controlled steering and functionality.
- **Access to Devices**—Students have access from the front of the cart, and IT administrators and teachers from the back. It's easy to remove the front doors for unrestricted access as well.
- **Rapid Wiring Technology**—User-friendly cable management bars and power brick wraps enable easy cable routing while also allowing easy changes. Additional options are available, including pre-wired units for maximum savings and efficiency.
- **Cooling**—Vented panels and doors help keep equipment cool.
- **Power**—The carts are equipped with a timer unit that provides timed outlets and one always-on user outlet. The timed outlets are preset to 15-minute increments and require no customer configuration. Power is provided to

One of several safety features, the "pinchless" tambour door (optional) helps prevent injury.

Individual slots hold a variety of netbooks, laptops, and tablets. Cart at right is shown with doors removed for easy access.

Shown with optional 2U drawer and storage shelf.

one shelf of equipment at a time. The always-on user outlet is internal to the cart for maximum safety, keeping children safe from the potential danger of electric shock. When equipped with the pop-up power option, two user outlets are provided on the top work surface.

- **Security**—Locking front doors; all-steel construction.
- **Cost**—Black Box cart solutions are economically priced and provide a much better overall value compared to most other solutions available on the market.
- **Safety-First Design**—Has no ledges for children to climb on, no sharp edges, and internal electrical components for maximum safety.
- **Storage Options**—Depending on configuration, Universal Computing Carts can be configured with optional shelf space for devices such as DVD players, printers, projectors, and other peripheral devices, as well as optional drawers to help keep you organized.
- **Extra Workspace 3**—A durable, laminated wood top enables teachers, administrators, and students to use printers, projectors, laptops, and other equipment on top of the cart, providing a smooth working and writing surface, unobstructed by handles or a metal lip.
- **Warranty**—Carts come with a lifetime warranty. All electronics come with a three-year standard warranty and optional warranty extensions.

The versatile, multi-function work surface can be used as a podium, projector platform, or computer area.

# Universal Computing Carts

## The cart you buy once and use forever.

A completely flexible mounting system means that you won't have to replace your school's carts every time you change or upgrade your tablets or notebooks. As technology changes, the carts can be easily reconfigured to your needs.

Choose from tambour or solid steel doors.

## Standard Features

Standard rack mounting allows greater flexibility.

Cable management is simple for all device types.

Sliding, "pinchless" tambour door saves space.

Power brick lacing stores power bricks easily and neatly (medium- and large-shelf models only).

Durable push/pull bar and power cord wrap.

Rackmounted shelf with rolled stainless steel device slots that help prevent scratches.

Locking IT access panel with quick-release tabs. Vented slots help keep equipment cool.

Locking front door and rear access panel.

- Slim-profile carts fit tight against a wall.
- Ideal in a classroom setting.
- Carts are guaranteed for life!

Carts can be configured for 18, 20, 27, 30, 36, or 40 device slots, depending on model.

Standard easy-grip handle and quiet, free-rolling casters make maneuvering the cart a breeze.

Easily removable front door(s) and rear access panel allow quick access to devices and cable management.

Standard Features (Continued)

Two-piece cable managers open easily for fast cable routing.

Laminate top provides extra working space.

Quick-release hinges on steel doors.

Two fixed and two rotating wheels provide easy maneuverability. Bumpers protect desks and walls.

Options (For an additional charge.)

Optional integrated pop-up power port for maximum safety.

Optional drawers and shelves available.

Color imprinting of your school's logo in one or two colors.

# iPad Syncing Carts

## Black Box iPad Syncing Carts

These carts have many of the same features as the carts on pages 2–5, but also offer the additional option of syncing capabilities.

You can keep all your school's iPad® tablets up to date with the latest software and files using iTunes®. Sync applications, audio/video content, contacts, calendars, documents, and more. All you need is a computer running iTunes (not included).

Power is sequentially supplied to each device to provide simultaneous charging. Power-on sequencing means each device is turned on, one at a time, to prevent a current overload when charging a large number of devices and to prevent jamming the USB port on the iTunes computer when the sync mode is set.

Locking tambour doors keep contents secure and can accommodate a padlock or combination lock. The three-point locking rear-access panel limits access to electrical components and the timer, so IT configurations remain secure. The retractable tambour door requires a smaller footprint to open and provides easy access to stored tablets. Vented side and rear panels aid in cooling.

Choose from 16- and 32- slot capacities, with or without syncing capabilities. The charging-only models are for tablets and e-readers that charge via USB or for iPad tablets that are not being synced.

*Cords are held in place with protective foam.*

*Hinged shelves open easily for feeding cables through.*

*16 or 32 slots hold a number of iPad tablets.*

Tablet, Laptop, and Netbook Depots offer you still more options.

- Netbook Depots store, charge, and secure netbooks, tablets, and other similar devices.
- Tablet Depots stores, charge, and secure tablet PCs, e-readers, and iPad® tablets.
- Laptop Depots store and secure up to eight laptops under a desk or in a standalone cart.
- Rear IT access panels allow for easy setup and maintenance.
- Locking metal doors keep contents secure.
- All are ideal in a classroom setting.
- Guaranteed for life!

Has a 120-V receptacle for each device.

Handy locking drawer holds peripheral devices.

Roll the Depot wherever you need it.

Grommets cable ports.

### Testimonials

---

"I've been ordering supplies from Black Box since 2007, and the quality of the products and service has always been outstanding. Plus, the fast, reliable shipping means I always have my materials when I need them. You'll see some more orders from me soon."

**Dan Latner**  
NeedWire.com

"I wanted to let you know that I really enjoyed dealing with your company. My call could have been recorded as an example of how to treat a customer. You were courteous and extremely helpful. There were no blind transfers and you answered all my questions. Thanks for being so great to deal with."

**Keith Hathcock**  
Community Operations, Inc.

"Thank you very much for all your help yesterday. It was a rare pleasure and surprise to find an American company that provides the timely service that you did, along with assistance in helping me determine the correct part I needed. I will not hesitate to use you again, and to recommend Black Box to associates who also need timely delivery of critical path communications items."

**Larry Voss**  
Andromeda Engineering, LLC

"You ROCK!! You have earned a new loyal customer with your service today. Thanks."

**Jim DiGennaro**  
City of Sitka, AK
