

Walk-and-Talk™ Cordless Adjustable Height Stand

Move
Adapt
Interact

Effortless, one-person height adjustment

No-slide storage basket

Battery and portable printer options

Flexibility Never Looked So Good

Sleek, extruded aluminum profiles, jumbo wheels, and a specially designed storage basket make this stand the ideal combination of aesthetics and application.

It's the only stand that adapts to the height of any user with the simplicity of the common appliance. Unique components in the stand's construction make the board seem light as a feather, so it only takes one person to lift or lower it - making it easy to engage people of all heights at the board or to fit under door frames.

Communication on Wheels

PolyVision's Adjustable Height Stand makes your Walk-and-Talk board mobile for easy sharing between both users and rooms. The stand's extra-large, easy-

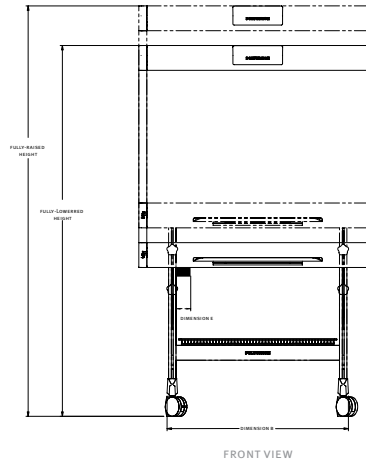

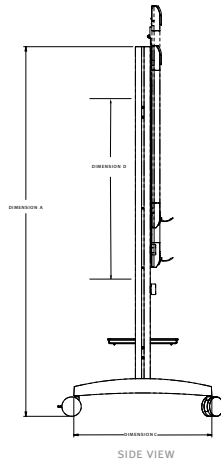

glide wheels allow you to roll the board effortlessly over door thresholds and different types of flooring. Two wheels are lockable to keep the stand from rolling out of place.

Cut the Cord

The beauty of mobility is that you get to present how you want, where you want so you're no longer tied to where the electrician put the outlet. Add the optional battery pack to your Adjustable Height Stand and go cordless so you get the power to capture, the power to mingle with your audience, and best of all, the power to roam - wirelessly.
