

iMMPadTM

wireless interactive multimedia tablet

Freedom To Present, Your Way. From anywhere in the classroom you're in complete control of your interactive presentation with the iMMPad.

Free Your Interactive Whiteboard!

There is no need to be tethered to the whiteboard at the front of your room. Using our wireless RF technology you can move around, sit down next to your students, pass the pad around, and explore the freedom of wireless interactive solutions. Using the iMMPad by Recordex is like having your interactive whiteboard or computer in the palm of your hand. With the wireless pen you can control applications, annotate over images, or even the entire screen. Control your lesson and your applications from virtually anywhere in the classroom.

As Easy To Use As Your Computer Mouse.

The learning curve is low with the iMMPad. The included stylus works like a mouse; tap the pad to click, push the stylus button to right click. Within a few minutes of practice you'll be selecting, clicking, dragging, dropping, annotating and hand-writing with ease.

Wireless Link with a Touch of a Button.

Class time is for learning, not wrestling with technology. You won't waste any time setting up your iMMPad. Once installed, the iMMPad is ready to go when you are. Simply plug in the USB dongle, and power on your pad. Within seconds you'll be controlling your interactive lesson plans from anywhere in the classroom. Adding pads is a cinch. Simply power on the additional pads, push the sync button on the pad and within seconds you can link up to 30 pads to a single computer.

Customizable, Quick Launch Buttons.

The iMMPad's quick launch buttons can be customized to meet your specific needs. Use them to link to files, or launch applications. With 16 macro buttons, everything you need will be just a pen-tap away. The shortcut buttons for easily paging up and down and controlling the system volume make remote control of your applications even easier.

Designed For Today's Classroom.

Weighing just 1.3lbs and built tough, the iMMPad is made using the highest grade materials designed for the rigors of today's classrooms. And with up to 16 hours of power under continuous use, our integrated Li-ion rechargeable battery offers class leading performance.
