iMM Pad ™

wireless interactive multimedia tablet

Freedom To Present, Your Way. From anywhere in the classroom you're in complete control of your interactive presentation with the iMMPad.

Free Your Interactive Whiteboard!

There is no need to be tethered to the whiteboard at the front of your room. Using our wireless RF technology you can move around, sit down next to your students, pass the pad around, and explore the freedom of wireless interactive solutions. Using the iMMPad by Recordex is like having your interactive whiteboard or computer in the palm of your hand. With the wireless pen you can control applications, annotate over images, or even the entire screen. Control your lesson and your applications from virtually anywhere in the classroom.

As Easy To Use As Your Computer Mouse.

The learning curve is low with the iMMPad. The included stylus works like a mouse; tap the pad to click, push the stylus button to right click. Within a few minutes of practice you'll be selecting, clicking, dragging, dropping, annotating and hand-writing with ease.

Wireless Link With A Touch Of A Button.

Class time is for learning, not wrestling with technology. You won't waste any time setting up your iMMPad. Once installed, the iMMPad is ready to go when you are. Simply plug in the USB dongle, and power on your pad. Within seconds you'll be controlling your interactive lesson plans from anywhere in the classroom. Adding pads is a cinch. Simply power on the additional pads, push the sync button on the pad and within seconds you can link up to 30 pads to a single computer.

Customizable Quick Launch Buttons.

The iMMPad's quick launch buttons can be customized to meet your specific needs. Use them to link to files, or launch applications. With 16 macro buttons, everything you need will be just a pen-tap away. The shortcut buttons for easily paging up and down and controlling the system volume make remote control of your applications even easier.

Designed For Today's Classroom.

Weighing just 1.3lbs and built tough, the iMMPad is made using the highest grade materials designed for the rigors of today's classrooms. And with up to 16 hours of power under continuous use, our integrated Li-ion rechargeable battery offers class leading performance.

Powerful Software Bundles.

Free annotation software and optional Interactive lesson platform software bundles with RM Easiteach!
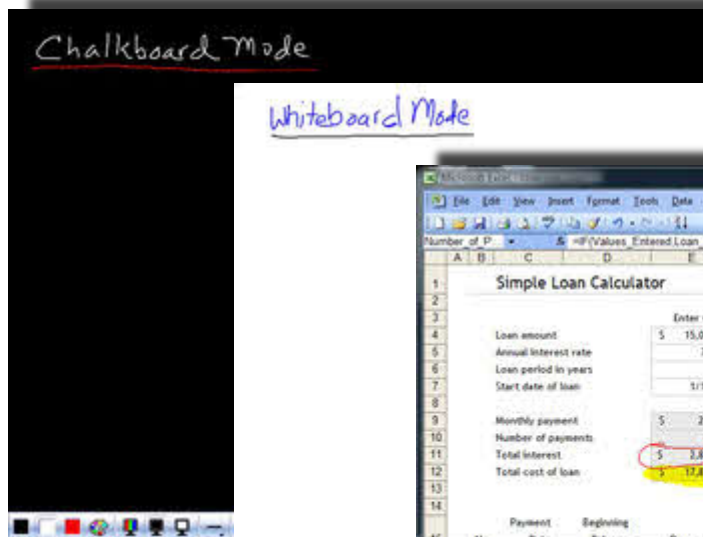

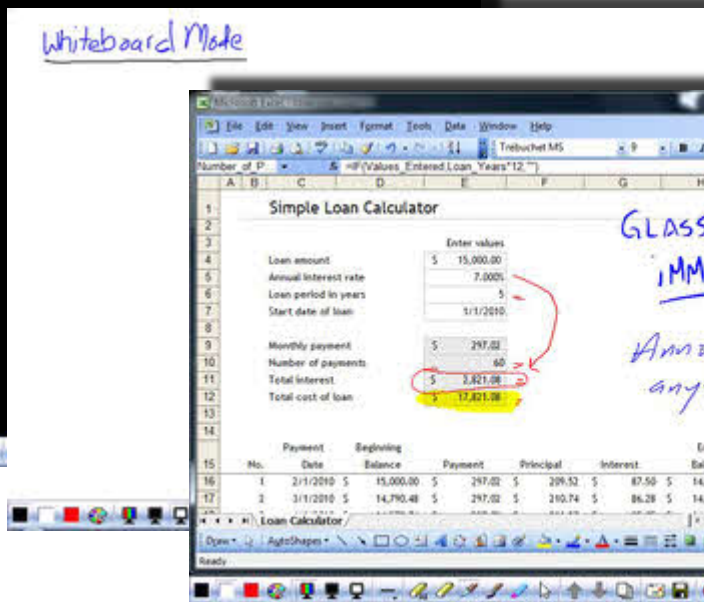

iMM Pad Bundled Software

Annotation Software.
The iMMPad is bundled with PowerPresenter II, a powerful on-screen annotation toolbar, that can be used in glass mode to annotate over your computer desktop (I.e. web pages, documents, photos, presentation slides, etc.) The toolbar also allows for easy switching between whiteboard and chalkboard modes. In these modes you can create an unlimited number of white or black slides and annotate over them. Short cut buttons allow for easy power point slide navigation. Advance a slide, annotate the page and even save the annotated page for future reference.

PowerPresenter II RE Annotation Toolbar

Chalkboard Mode. Write on a black background to simulate a traditional chalkboard.
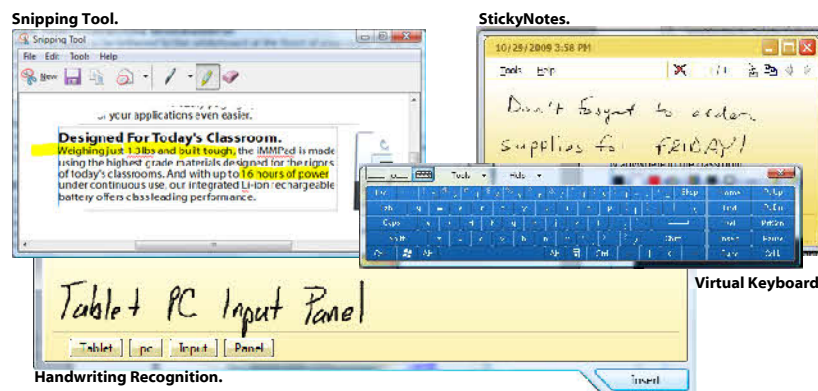

Whiteboard Mode. Write on a white background to simulate whiteboard use.

Glass Mode.
Glass mode allows for easy annotation over anything displayed on your computer. The glass mode applies a transparent layer over your desktop. Using PowerPresenter tools you can annotate over this transparent layer without affecting the underlying image.

Perfect for marking up a PowerPoint lesson plan while teaching.

Tight Integration with Tablet PC Features.
The iMMPad tightly integrates with the Tablet PC features of Windows Vista* and Windows 7. After installing the iMMPad on your desktop or notebook the Tablet PC features will be automatically available for use.

Snipping Tool.

StickyNotes.

Virtual Keyboard.

Handwriting Recognition.

Ships with Mac OSX Driver.
While the PowerPresenter RE II software is for Windows users only the iMMPad does ship with a Mac OSX Driver and integrates seamlessly with the Mac handwriting recognition software ("Ink"). Mac users are free to use any 3rd party software made for Mac.

Third Party Software.
The iMMPad is compatible with virtually any third party software which relies on tablet or mouse input. Enjoy exploring your options without being tied to a proprietary software suite.

Educators will be especially interested in our RM Easiteach Bundle. Get the award winning RM Easiteach interactive lesson platform bundled with your iMMPad.

* Tablet PC Features are not included in the Home Basic version of Vista.

RM Easiteach

Interactive Whiteboard and Slate Software for Teachers'
