8. Troubleshooting .................................................................. 19
1. Introduction
After installing the Ladibug™ application, you can use the software to:
- Control the Document Camera
- Capture and record images.
- Annotate the image, highlight important details and save it.
- Support the full screen function.

2. System requirements
MAC OS X 10.4 / 10.5 / 10.6 (32-bits Kernel)
- Min. CPU: PowerPC G4 866MHz or Intel Pentium® 1.83GHz Intel Core 2 Duo
- Min. memory: 512MB
- Min. resolution: 1024x768
- 24-bit color display monitor
- Min. hard drive space: 1GB
- QuickTime 7.4.5 and above

[Remark] The MAC OS is not supported for a wireless connection like model “DC-A11”.
3. Installing Ladibug™

[Remark] The MAC OS is not supported for a wireless connection like model “DC-A11”.

1. Insert the software CD into the CD-ROM drive.
2. Click on the CD icon.
3. Select MAC folder and click [Ladibug_MAC] to open the installation wizard and begin to install following the on-screen instruction.

4. Click [Continue].

5. Click [Install].
6. Enter the username and password, and then press [OK].

![Password Input]

7. Click [Continue Installation].

![Continue Installation]

8. Press [Restart] to finish the software installation.

![Installation Completed]

Click Restart to finish installing the software.
4. Connection to the hardware

<Very Important> To ensure successful installation, please follow each of the following steps.

4.1. Connect the power cord of the Document Camera

![Image of power cord connection]

<Note> Appearance may vary depending on country/region.

4.2. Pressing the [POWER] button on the remote control or the Document Camera for about 5 seconds. When the light next to the power button is lit, the machine is ready to use.

4.3. Connect USB cable to the Document Camera your computer.

5. Start to use Ladibug™

5.1. Double-click the [Ladibug] icon on the desktop to launch Ladibug™.

5.2. Mouse over [Ladibug] icon to expand menu functions.

5.3. Click [PREVIEW] icon to start to use.
6. Operation Interface Description

6.1 Software Screen Introduction

- Click to on/off the power.

  <Note> When the Document Camera is on, the light will flicker; you can’t turn it on until the light stops flicker.

7.2 I would like to display a live image

- Click to display the live image.

7.3 I would like to capture images

- Click to capture images.

  [Note] The captured images will be displayed in the Thumbnail area.

7.4 I would like to capture images continuously

- Click to open burst mode setting. Click [OK] after setting.

  <Note> Please refer to 6.7 Time Lapse for more Time Lapse settings.
  <Note> The captured images will be displayed in the Thumbnail window.

7.5 I would like to freeze the live image

- Click to freeze the live image of Ladibug™.

- Click once again to lift the freeze.
7.6 I would like to annotate the displayed image

<Note> To annotate the saved image, please open the pictures of the Thumbnail area.

- Click to open the annotation tools.
- Select a annotation tool.

- Select pen color.

- Select line thickness.

- Select transparency.

- Mark or annotate the displayed image.

<Remark> You can Click to capture images if they are live images. You can click [SAVE] or [SAVE AS] to save the files if they are image files opened from the Thumbnail.

<Remark> You can add annotation when recording, but you can’t save it
7.7 I would like to add textual annotation to images

- Click to open the annotation tools.
- Select .
- Select pen color.
- Select transparency.
- Select font and font size.
- Drag a block on the picture then start to enter text.

<Remark> You can Click to capture images if they are live images. You can click [SAVE] or [SAVE AS] to save files if they are image files.
7.8 I would like to record videos

- Click to open the recording tool.

**<Note>** Click to open the interface of video format and audio source setting, please refer to **6.6 Options** for more details

- Click to start recording.

- Press to stop recording.

- Click to close the recording tool.

**<Remark>** You can use annotation tools when recording, but you can’t save it.

7.9 I would like to use the mask mode

- Click to open the mask mode.
- You can directly modify the length and the width of the block with mouse.

- Click to modify the transparency of the block.

- Click to close the mask mode.

7.10 I would like to use the spotlight mode

- Click to open Spotlight mode.
- Modify the length and the width with mouse.

- Click to modify the shape and transparency of the block.

- Click to close the Spotlight mode.
7.11 I would like to manage saved image files.

7.11.1 Save as a new file

- First, double-click the picture or image file in the “Thumbnail” window on the left side of the screen.

- Click [Save as], then “Save As” window will pop up.

- After inputing “file name”, click [SAVE] to finish saving.

7.11.2 Change the location of file access

- Click [Directory], then “OPEN” window will pop up.
After selecting the location of the folder, click [Choose] to change the folder for saving pictures next time.

7.11.3 Delete File

➢ First, double-click the picture in the “Thumbnail” window on the left side of the screen.

➢ Click [Delete] 🗑️, then “Delete File” window will pop up. Click [Yes] to delete files.

7.11.4 Send files by E-mail function.

➢ First, double-click the picture in the “Thumbnail” window on the left side of the screen.

➢ Click [E-mail] 📧, then “Email File” window will pop up. Click [Yes] to open e-mail.
8. Troubleshooting

8.1 Question: Black screen is displayed in live image after Ladibug™ was re-installed.

Solution:
1. Remove the Ladibug™ then restart the computer.
2. Re-install the Ladibug™

8.2 Question: When running the Ladibug™, no image is displayed and get a Ladibug error message:

“System video limitation reached. Please refer to the troubleshooting section of the Ladibug user's manual.”

Solution:
1. Please check if you are using an extended desktop (two monitors) hooked up to the computer. If so, please try to move the Ladibug™ shortcut to the extended desktop (the second monitor) and launch it.
2. If step 1 still doesn’t work, please turn off extended desktop.
3. If step 2 still doesn’t work, please reduce the resolution of desktop.
4. If step 3 still doesn’t work, please re-install Ladibug™ software.
