

Break Through

your classroom's physical boundaries...

Intelli-Mount

OCBM - Over ChalkBoard Mount

Now educators have another option when it comes to installing interactive whiteboard technology in their classroom! The Numonics Intelli-Mount is a revolutionary new mounting system that gives schools increased flexibility.

Unlike standard wall mounts, the Intelli-Mount utilizes an over-the-chalkboard design enabling teachers to give their students all of the proven benefits of interactive whiteboards, without damaging existing blackboards or whiteboards.

Made with Pride in the USA

The Intelli-Mount also functions as a cost-effective alternative to our rolling stand, or as a great option for classrooms where space is at a premium.

Your interactive whiteboard isn't designed to be a "one-size-fits-all" tool; so why should the mounting system be? Break through your classroom's boundaries with the Numonics Intelli-Mount designed for the Intelliboard interactive whiteboard.

Works with 3M & Hitachi
Super Close Projection Systems

Attaches
easily over
your existing
blackboard or
whiteboard
