

Tool Factory Early Learning Bundle

Introduce your students to computer learning at a foundation age with Tool Factory's Early Learning Bundle! Bursting with 13 different software programs this bundle fits a wide range of niches to get students interested in computers and learning at an early age. Subjects include cause-and-effect, memory building, musical integration, visual tracking, early phonics and so much more! These titles are ideal for directing young learners into the education stream and sparking interest using the animated instructive games. The retail value is \$725! **Item Number 2195** **Single \$599.95** **Site License \$4399.95**

Some of the products in this bundle include:

Tool Factory Beep! Activities encourage emerging learners to express their ideas, while developing important IT skills and building confidence with the computer. There are endless opportunities for creative thinking and discussion. Tool Factory Beep! is ideal for early learners, autism, and pre-readers.

Making Creatures Aimed at children aged 3 and up, this engaging dual format CD-ROM includes a range of activities that can extend its use to include older learners as well as for those with specific educational needs. Young children love the creatures and the animations that go with them!

Tool Factory Mini Musical Monsters Create melodies, compose songs and even learn the notes of popular tunes using Mini Musical Monsters! Mini Musical Monsters contains six engaging musical activities for 3 - 5 year-olds. Mini Musical Monsters contains no speech and does not require reading skills. It is a valuable addition to an early years or foundation stage setting.

Letter Olympics - For B/D Reversals Challenge your students in Olympic sporting events to help them discriminate between b and d. Activities cover recognition, discrimination, and differentiation for lower case letters b and d, with full auditory and visual instructions emphasizing accurate sound pronunciation of the b and d phonemes.

Leaps and Bounds 1 A simple interface lets young children develop pre-reading skills featuring colorful characters, catchy music, and fun surprises. They'll practice essential skills such as left-to-right tracking, visual and auditory discrimination, memory, and fine motor skills as they mouse click through these totally enjoyable activities.

Eye Track Eye Track is designed to support learners of all ages experiencing difficulty with visual perception. Health agencies and Occupational Therapists will find this program invaluable for use with clients.

Tool Factory Phonics 1 Start by selecting a target sound from the group such as 'b'. Listen to a captivating story that includes many 'b' words. Next, students are challenged to find the 'b' sound on each story page. Students will be captivated as they separate sounds into groups, select a sound and play the three activities for every sound!

Fresco This paint program is an art teacher's dream! It simulates real painting tools including crayons, charcoal, pastel, airbrush and watercolor. Ideal for use with a whiteboard, projector, or pressure sensitive pen tablet.
